

vienna.rb meetup #8

Lukas Fittl
Data visualisation

Hannes Stiebitzhofer
Heroku, Rails, Angular.js

Gerald Bauer
Using Web Feeds to Build Planet Sites

Ruby Coding Dojo

Thursday, November 28

vienna.rb meetup #9

Thursday, December 5

Andreas Tiefenthaler
Docker

Thomas Schranz
TBA

Michal Fojtik
OpenShift loves Sinatra and WebSockets

The background of the image is a solid light pink color. It is covered with a repeating pattern of white, hand-drawn geometric shapes. These shapes are three-dimensional cubes or rectangular prisms, drawn from an isometric perspective. Each cube is outlined with thin white lines, and some internal lines are also drawn to create a sense of depth and structure. The cubes are scattered across the entire surface in a non-uniform but repeating manner.

@viennarb

The background of the image is a solid light pink color. It is covered with a repeating pattern of white, hand-drawn geometric shapes. These shapes are three-dimensional cubes or rectangular prisms, drawn from an isometric perspective. Each cube is outlined with thin white lines, and some internal edges are also visible, giving them a wireframe appearance. The cubes are scattered across the entire surface in a non-uniform but dense arrangement.
